Wegener's hypothesis was all continents were once \_\_\_\_\_

\_\_\_\_\_ 300 million years ago they began to \_\_\_\_\_

\_\_\_\_\_ proved his idea

But scientists \_\_\_\_\_ his \_\_\_\_\_ because he could not explain the \_\_\_\_\_ and \_\_\_\_\_ of the \_\_\_\_\_

So we now know that every night, \_\_\_\_\_ farther \_\_\_\_\_ again \_\_\_\_\_

and \_\_\_\_\_ rising

This movement causes \_\_\_\_\_ types of boundaries

1) \_\_\_\_\_ boundaries

-these plates rockin' from \_\_\_\_\_ to \_\_\_\_\_

2) \_\_\_\_\_ boundaries

-move \_\_\_\_\_ and occur at the \_\_\_\_\_

\_\_\_\_\_

3) \_\_\_\_\_ boundaries

\_\_\_\_\_ to \_\_\_\_\_

makes \_\_\_\_\_ but no \_\_\_\_\_

But continent to \_\_\_\_\_ moves down, down, down

Earth's interior divided into \_\_\_\_\_

\_\_\_\_\_ and \_\_\_\_\_

The \_\_\_\_\_ and \_\_\_\_\_

float on the \_\_\_\_\_

Both cores made of hot \_\_\_\_\_ & \_\_\_\_\_

From \_\_\_\_\_ to the \_\_\_\_\_ all layers differ...

\_\_\_\_\_ and \_\_\_\_\_
